

MD. TANVIR

FULL STACK JAVA DEVELOPER

CAREER OBJECTIVE

Self-motivated Full Stack Java Developer who enjoys solving real problems through code, skilled in Java, Spring Boot, Angular, Typescript, and Flutter. Built and maintained a complete Supply Chain Management System from database design to user interface covering procurement, inventory, quality control, sales, and delivery operations, delivered across web, native Android, and cross-platform apps. Also developed a desktop POS application using Java Swing and MySQL. Holds an MBA in Management from Dhaka University, combining technical and business perspective. Comfortable working independently, quick to learn new tools, and looking for a role where I can contribute from day one and grow into more responsibility over time.

PROJECTS & SUPPORTING TOOLS

Supply Chain Management System

Technologies: Java, Spring Boot, Angular, Typescript, MySQL, Tailwind CSS

- Developed an end-to-end Supply Chain Management System covering Procurement, Import, Inbound Logistics, Quality Control, Inventory, Sales, and Delivery operations.
- Developed 15+ core modules, including Purchase Requisition, Quotation, Purchase Order (PO), PO Line Item, Letter of Credit (LC), LC Bank, Shipment, Goods Received Note (GRN), GRN Line Item, QC Inspection, QC Checklist, Inventory, Stock Movement, Customer, Customer Order, Order Line Item, Invoice, Delivery/Trip, Vehicle, Driver, and Daily Report.
- Implemented Purchase Order (PO) tracking to monitor ordered items and procurement progress, along with Customer Order tracking to monitor order status throughout the sales cycle.
- Built Quality Control & Inventory workflows with PASS/FAIL validation, automatically transferring approved products from QC Hold to Available Warehouse while routing rejected products through return/rejection processes.
- Developed Customer Order, Order Line Item, and Invoice management, plus Delivery/Trip, Vehicle, Driver, and Daily Report modules for complete sales, transportation, and delivery lifecycle management.
- Built responsive Angular dashboards and operational interfaces using Tailwind CSS, with Chart.js-based reporting and analytics for supply chain operations.

TECHNICAL TRAINING

Enterprise System Analysis & Design – JEE

IDB-BISEW IT Scholarship Project |
Center for Computer Studies Ltd.
(CCSL) Nov 2025 – Sep 2026 |

788 Hours

SKILLS

- Java
- Spring Boot
- Angular
- Typescript
- Web Design
- Flutter
- Android
- SQL / NoSQL
- Firebase

LANGUAGE

Bengali — Native
English — Professional
Hindi — Verbal

PERSONAL DETAILS

Father's Name: Md. Fazlul Karim
Mother's Name: Mst. Hasiyara
Date of Birth: 10th Oct 1999
Gender: Male
Religion: Islam
Marital Status: Unmarried
Nationality: Bangladeshi

EDUCATION QUALIFICATIONS

MBA in Management
Gov. Bangla collage (DU) | CGPA:
3.17 | 2022–2023
BBA in Management
Gov. Bangla collage (DU) | CGPA:
3.04 | 2018–2019
H.S.C in Business Studies
Ulla Para Science College | GPA:
4.17 | 2018
S.S.C in Business Studies
Khondokar Abdul Majid High School
| GPA: 4.67 | 2016

Supply Chain Management System (Native Android)

Technologies: Java, Android, Spring Boot, MySQL

- Developed a native Android Supply Chain Management application integrated with a Spring Boot backend through REST APIs, covering procurement, inventory, QC, sales, and delivery operations.
- Implemented JWT authentication, TOTP-based MFA, and role-based access control, with Email/Mailing and Web Socket real-time notifications for OTP verification and activity updates.

GitHub: <https://github.com/tanvirhasan66270/SupplyChainManagement>

Supply Chain Management System (Cross Platform)

Technologies: Flutter, Dart, Spring Boot, MySQL

- Developed a cross-platform Flutter mobile app integrated with the existing Spring Boot REST APIs, covering procurement, inventory, QC, sales, and delivery operations with secure JWT authentication, role-based access, and real-time Email/Web Socket notifications.
